

EHRP Alert #4 -- CAN ROLLOVER

CAN Rollover Performed!

How were the CAN codes modified in EHRP?

- On Monday, 09/30/02 after 7 pm EDT, a program was run to insert a 980-0 action into each active employee's record. The CAN on this row was modified so that the first digit is now a 3. This row was effective dated 10/01/2002. If there was an existing 10/1 row in the employees record, its CAN was changed and the sequence for the 980-0 action was increased to a 2.

What happened if there was a future dated action in that employee's record?

- The CAN rollover program updated the CAN on these actions too, even if they were pending (i.e. Not yet processed).

What if that future dated action had a CAN code that was different from the 9/30/02 or prior dated row?

- The CAN on the future dated action was still changed to a 3, so that it reflects FY'03 but it was written to an error file for validation by the Agency. (For example, if an employee was being reassigned effective 10/5/02, their CAN would differ from the prior action's CAN. Only the fiscal year indicator was changed on the CAN for the 10/5/02 row.)
